LIQUIDITY AND CAPITAL RESOURCES

Our liquidity and capital resources are derived primarily from proceeds of securities offerings, debt capital and cash flows from operations, including investment sales and repayments, and income earned. We have used, and expect to continue to use, our debt capital, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives. For more information on how the COVID-19 pandemic may impact our ability to comply with the covenants of the Credit Facility, see our Quarterly Report on Form 10-Q for the quarter ended March 31, 2021, including “Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – COVID-19 Developments”.

The annualized weighted average cost of debt for the six months ended March 31, 2021 and 2020, inclusive of the fee on the undrawn commitment on the Credit Facility, amendment costs and debt issuance costs, was 3.4% and 4.1%, respectively. Our operating activities provided cash primarily from our investment activities and our financing activities used cash primarily to pay down our Credit Facility, partially offset by the 2026 Notes issuance.

Our operating activities used cash primarily for our investment activities and our financing activities provided cash primarily from draws on our Credit Facility, partially offset by distributions paid to stockholders.
