The spread may change based on the type of rate used. The terms in the Consolidated Schedule of Investments disclose the actual interest rate in effect as of the reporting period. SOFR loans are typically indexed to a 30-day, 90-day or 180-day SOFR rates (1M S, 3M S, or 6M S, respectively) at the borrower's option. SONIA loans are typically indexed daily for GBP loans with a quarterly frequency payment. All securities are subject to a SOFR or Prime rate floor where a spread is provided, unless noted. The spread provided includes payment-in-kind, or "PIK", interest and other fee rates, if any.
- (2) Valued based on our accounting policy (See Note 2).

1. ORGANIZATION

PennantPark Floating Rate Capital Ltd. (the "Company", "we," "our" or "us") was organized as a Maryland corporation in October 2010. We are a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. On April 14, 2022, trading of the Company's common stock commenced on the New York Stock Exchange after the Company voluntarily withdrew the principal listing of its common stock from the Nasdaq Stock Market LLC.

Our principal investment objectives are to generate both current income and capital appreciation while seeking to preserve capital. We seek to achieve our principal investment objective by investing primarily in floating rate loans, and other investments made to U.S. middle-market private companies whose debt is rated below investment grade. Floating rate loans pay interest at variable rates, which are determined periodically, on the basis of a floating base lending rate such as SOFR, with or without a floor, plus a fixed spread. Under normal market conditions, we generally expect that at least 80% of the value of our managed assets will be invested in floating rate loans and other investments bearing a variable rate of interest, which may include, from time to time, variable rate derivative instruments. We generally expect that first lien secured debt will represent at least 65% of our overall portfolio. We generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including second lien secured debt, subordinated debt, and, to a lesser extent, equity investments.

We execute our investment strategy directly and through our wholly owned subsidiaries, our unconsolidated joint venture and unconsolidated limited partnership. The term "subsidiary" means entities that primarily engage in investment activities in securities or other assets and are wholly owned by us. The Company does not intend to create or acquire primary control of any entity which primarily engages in investment activities of securities or other assets other than entities wholly owned by the Company. We comply with the provisions of Section 18 of the 1940 Act governing capital structure and leverage on an aggregate basis with our subsidiaries. Our subsidiaries comply with the provisions of Section 17 of the 1940 Act related to affiliated transactions and custody. To the extent that the Company forms a subsidiary advised by an investment adviser other than the Investment Adviser, the investment adviser to such subsidiaries will comply with the provisions of the 1940 Act relating to investment advisory contracts, including but not limited to, Section 15, as if it were an investment adviser to the Company under Section 2(a)(20) of the 1940 Act.

We have entered into an investment management agreement, (the "Investment Management Agreement"), with PennantPark Investment Advisers LLC (the "Investment Adviser"), an external adviser that manages our day-to-day operations. We have also entered into an administration agreement, (the "Administration Agreement"), with PennantPark Investment Administration LLC (the "Administrator"), which provides the administrative services necessary for us to operate.

Funding I, our wholly owned subsidiary and a special purpose entity, was organized in Delaware as a limited liability company in May 2011. We formed Funding I in order to establish a credit facility. The Investment Adviser serves as the collateral manager to Funding I and has irrevocably directed that any management fee owed with respect to such services is to be paid to us so long as the Investment Adviser remains the collateral manager. This arrangement does not increase our consolidated management fee.

We have formed and expect to continue to form certain taxable subsidiaries, including the Taxable Subsidiary, which are subject to tax as corporations. These taxable subsidiaries allow us to hold equity securities of certain portfolio companies treated as pass-through entities for U.S. federal income tax purposes while facilitating our ability to qualify as a RIC under the Code.

In May 2017, we and a subsidiary of Kemper Corporation (NYSE: KMPR), Trinity Universal Insurance Company, ("Kemper"), formed PSSL, an unconsolidated joint venture. PSSL invests primarily in middle-market and other corporate debt securities consistent with our strategy. PSSL is a Delaware limited liability company. See Note 4.

In August 2025, we and Hamilton Lane ("HL") formed PSSL II, an unconsolidated joint venture. PSSL II invests primarily in middle-market and other corporate debt securities consistent with our strategy. PSSL II is a Delaware limited liability company. See Note 4.

In September 2019, the Securitization Issuers completed the Debt Securitization. The 2031 Asset-Backed Debt was secured by a carefully constructed portfolio of the Securitization Issuer consisting primarily of middle market loans and participation interests in middle market loans. The 2031 Asset-Backed Debt was to mature on October 15, 2031. On the closing date of the Debt Securitization, in consideration of our transfer to the Securitization Issuer of the initial closing date loan portfolio, which included loans distributed to us by certain of our wholly owned subsidiaries, the Securitization Issuer transferred to us 100% of the Preferred Shares of the Securitization Issuer, 100% of the Class D Secured Deferrable Floating Rate Notes issued by the Securitization Issuer, and a portion of the net cash proceeds received from the sale of the 2031 Asset-Backed Debt. See Note 10.

In July 2024, the 2031 Asset-Backed Debt was refinanced through a \$351.0 million debt securitization in the form of a collateralized loan obligation, or the "2036-R Asset-Backed Debt". The Company initially retained \$85.0 million of the debt securitization. In October 2025, the Company sold \$21.0 million of the previously retained debt securitization. The 2036-R Asset-Backed Debt is secured by a carefully constructed portfolio of primarily middle market loans and participation interest in middle market loans. The 2036-R Asset-Backed Debt matures in July 2036.

On February 22, 2024, the 2036 Securitization Issuer completed the 2036 Debt Securitization. The 2036 Asset-Backed Debt is secured by a carefully constructed portfolio of the 2036-Securitization Issuer consisting primarily of middle market loans and participation interests in middle market loans. The 2036 Asset-Backed Debt matures in April 2036. On the closing date of the 2036 Debt Securitization, in consideration of our transfer to the 2036 Securitization Issuer of the initial closing date loan portfolio it included loans distributed to us by certain wholly owned subsidiaries. See Note 10.

In February 2026, the 2036 Asset-Backed Debt was refinanced through a \$356.5 million debt securitization in the form of a collateralized loan obligation, or the "2038-R Asset-Backed Debt". The Company retained \$69.5 million of the debt securitization. The replacement debt matures in April 2038. The replacement debt was 100% funded at closing. The 2038-R Asset-Backed Debt is secured by a carefully constructed portfolio of the 2038-R Securitization Issuer consisting primarily of middle market loans and participation interests in middle market loans. See Note 10.

In February 2025, the 2037 Securitization Issuer completed a \$474.6 million term debt securitization (the "2037 Debt Securitization"). The Company initially retained \$85.1 million of subordinated notes and \$28.5 million of BBB-(sf) Class D Notes of the debt securitization issued by the 2037 Securitization Issuer. In November 2025, the Company sold \$28.5 million of the previously retained Class D Notes. The 2037 Asset-Backed Debt is secured by a carefully constructed portfolio of the 2037-Securitization Issuer consisting primarily of middle market loans and participation interests in middle market loans. The 2037 Asset-Backed Debt matures on April 20, 2037. See Note 10.

In March 2021 and October 2021, we issued \$100.0 million and \$85.0 million, respectively, in aggregate principal amount of our 2026 Notes at a public offering

The effective interest rate is 4.15%. The 2026 Notes mature on April 1, 2026 and may be redeemed in whole or in part at our option subject to a make-whole premium if redeemed more than three months prior to maturity. The 2026 Notes are our general, unsecured obligations and rank equal in right of payment with all of our existing and future senior unsecured indebtedness. The 2026 Notes are effectively subordinated to our existing and future secured indebtedness to the extent of the value of the assets securing such indebtedness and are structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, financing vehicles, or similar facilities. We do not intend to list the 2026 Notes on any securities exchange or automated dealer quotation system. The 2026 Notes were repaid in full on April 1, 2026.

In March 2026, we issued \$200.0 million in aggregate principal amount of our 2029 Notes at a public offering price per note of 99.3%. Interest on the 2029 Notes is paid semiannually on March 4 and September 4 of each year, at a rate of 6.75% per year, commencing September 4, 2026. The effective interest rate is 7.00%. The 2029 Notes mature on March 4, 2029 and may be redeemed in whole or in part at our option subject to make whole premium if redeemed more than three months prior to maturity. The 2029 Notes, are our general, unsecured obligations and rank equal in right of payment with all of our existing and future unsecured indebtedness. The 2029 Notes are effectively subordinated to our existing and future secured indebtedness to the extent of the value of the assets securing such indebtedness and are structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, financing vehicles, or similar facilities. We do not intend to list the 2029 Notes on any securities exchange or automated dealer quotation system.

In April 2021, we formed PennantPark-TSO Senior Loan Fund LP ("PTSF"), an unconsolidated limited partnership, organized as a Delaware limited liability partnership. We sold \$81.4 million in investments to a wholly owned subsidiary of PTSF in exchange for cash in the amount of \$69.5 million and an \$11.9 million equity interest in PTSF representing 23.08% of the total outstanding Class A Units of PTSF. We recognized \$0.4 million of realized gain upon the formation of PTSF.

In August 2025, in connection with the winding down of PTSF, an unconsolidated limited partnership, the Company acquired a portfolio of approximately \$250 million of assets, including from TSO Puma SPV, LLC, an affiliate of Towerbrook Capital Partners. This portfolio includes assets with which the Company's Investment Adviser is familiar. The average spread and credit statistics are generally in-line with PFLT's existing portfolio. The Company acquired these assets at their most recent fair market value as of the date of the transaction. As of August 27, 2025, PFLT was the only remaining partner in PTSF, and as a result the entity became a wholly owned consolidated subsidiary as of that date.

On February 4, 2022, we formed PFLT Investment Holdings II, LLC, a Delaware limited liability company ("Holdings II"), as a wholly owned subsidiary. On December 31, 2022, we contributed 100% of our interests in PFLT Investment Holdings, LLC ("Holdings") to Holdings II. Effective as of January 1, 2024, Holdings II elected to be treated as a corporation for U.S. federal income tax purposes. On January 3, 2024, we purchased an equity interest in Holdings from Holdings II and Holdings became a partnership for U.S. federal income tax purposes. The Company and Holdings II entered into a limited liability company agreement with respect to Holdings that provides for certain payments and the sharing of income, gain, loss and deductions attributable to Holdings' investments.

In July 2024, the Company established a \$500.0 million at-the-market offering program (the "2024 ATM Program") and terminated the existing \$250.0 million at-the-market offering program (the "2022 ATM Program" and, together "with the 2024 ATM Program, the "ATM Programs").

During the three and six months ended March 31, 2026, we did not issue any shares of our common stock under the ATM Programs. During the three and six months ended March 31, 2025 we issued 11,562,000 shares and 18,838,000 shares of our common stock under the ATM Programs, respectively, at an average price of \$11.34 per share and \$11.35 per share raising \$131.0 million and \$213.2 million of net proceeds after commissions to Sales Agents (as defined below) and inclusive of proceeds from the Investment Adviser to ensure that all shares were sold at or above NAV, respectively. During the three and six months ended March 31, 2026, we did not incur any legal and other offering costs associated with establishing the ATM Programs. During the three and six months ended March 31, 2025, we incurred \$0.2 million and \$0.2 million of legal and other offering costs associated with establishing the ATM Programs. As of March 31, 2026 and September 30, 2025, we had \$192.2 million and \$192.2 million, respectively, of our common stock available to be sold under the ATM Programs.

The Investment Adviser has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act of 1936, as amended (the "Commodity Exchange Act"). The Investment Adviser intends to continue to affirm the exclusion on an annual basis and therefore, does not expect to be subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

2. SIGNIFICANT ACCOUNTING POLICIES

The preparation of our consolidated financial statements, in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amount of our assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the reported periods. In the opinion of management, all adjustments, which are of a normal recurring nature, considered necessary for the fair presentation of financial statements have been included. Changes in the economic and regulatory environment, financial markets, the creditworthiness of our portfolio companies, and any other parameters used in determining these estimates and assumptions could cause actual results to differ from these estimates and assumptions. We may reclassify certain prior period amounts to conform to the current period presentation. We have eliminated all intercompany balances and transactions. References to the Financial Accounting Standards Board's ("FASB's"), Accounting Standards Codification, as amended ("ASC"), serve as a single source of accounting literature. Subsequent events are evaluated and disclosed as appropriate for events occurring through the date the Consolidated financial statements are issued.

Our consolidated financial statements are prepared in accordance with GAAP, consistent with ASC Topic 946, Financial Services – Investment Companies, and pursuant to the requirements for reporting on Form 10-K/Q and Articles 6, 10 and 12 of Regulation S-X, as appropriate. In accordance with Article 6-09 of Regulation S-X, we have provided a consolidated statement of changes in net assets in lieu of a Consolidated Statement of Changes in Stockholders' Equity.

Our significant accounting policies consistently applied are as follows:

(a) Investment Valuations

We expect that there may not be readily available market values for many of the investments, which are or will be in our portfolio. We value such investments at fair value as determined in good faith by or under the direction of our board of directors using a documented valuation policy and a consistently applied valuation process, as described in this Report. With respect to investments for which there is no readily available market value, the factors that the board of directors may take into account in pricing our investments at fair value include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we consider the pricing indicated by the external event to corroborate or revise our

PENNANTPARK FLOATING RATE CAPITAL LTD. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-(Continued)
MARCH 31, 2026
(Unaudited)

valuation. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and the difference may be material. See Note 5.

Our portfolio generally consists of illiquid securities, including debt and equity investments. With respect to investments for which market quotations are not readily available, or for which market quotations are deemed not reflective of the fair value, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- (1) Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our Investment Adviser responsible for the portfolio investment;
- (2) Preliminary valuation conclusions are then documented and discussed with the management of the Investment Adviser;
- (3) Our board of directors also engages independent valuation firms to conduct independent appraisals of our investments for which market quotations are not readily available or are readily available but deemed not reflective of the fair value of the investment. The independent valuation firms review management's preliminary valuations in light of their own independent assessment and also in light of any market quotations obtained from an independent pricing service, broker, dealer or market maker;
- (4) The audit committee of our board of directors reviews the valuations of our Investment Adviser and those of the independent valuation firms on a quarterly basis, periodically assesses the valuation methodologies of the independent valuation firms, and responds to and supplements the valuation recommendations of the independent valuation firms to reflect any comments; and
- (5) Our board of directors discusses these valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our Investment Adviser, the respective independent valuation firms and the audit committee.

Our board of directors may use market quotations to assess the value of our investments for which market quotations are readily available. We obtain such market values from independent pricing services or at bid prices obtained from at least two brokers or dealers, if available, or otherwise from a principal market maker or a primary market dealer. The Investment Adviser assesses the source and reliability of bids from brokers or dealers. If the board of directors has a bona fide reason to believe any such market quote does not reflect the fair value of an investment, it may independently value such investments by using the valuation procedure that it uses with respect to assets for which market quotations are not readily available.

(b) Security Transactions, Revenue Recognition, and Realized/Unrealized Gains or Losses

Security transactions are recorded on a trade-date basis. We measure realized gains or losses by the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment, using the specific identification method, without regard to unrealized appreciation or depreciation previously recognized, but considering prepayment penalties. Net change in unrealized appreciation or depreciation reflects the change in the fair values of our portfolio investments, and the Credit Facility during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

We record interest income on an accrual basis to the extent that we expect to collect such amounts. For loans and debt investments with contractual PIK interest, which represents interest accrued and added to the loan balance that generally becomes due at maturity, we will generally not accrue PIK interest when the portfolio company valuation indicates that such PIK interest is not collectable. We do not accrue as a receivable interest on loans and debt investments if we have reason to doubt our ability to collect such interest. Loan origination fees, original issue discount ("OID"), market discount or premium and deferred financing costs on liabilities, which we do not fair value, are capitalized and then accreted or amortized using the effective interest method as interest income or, in the case of deferred financing costs, as interest expense. We record prepayment penalties earned on loans and debt investments as income. Dividend income, if any, is recognized on an accrual basis on the ex-dividend date to the extent that we expect to collect such amounts. From time to time, the Company receives certain fees from portfolio companies, which may or may not be non-recurring in nature. Such fees include loan prepayment penalties, structuring fees, amendment fees and agency fees, and are recorded as other investment income when earned. Litigation settlements are accounted for in accordance with the gain contingency provisions of ASC Subtopic 450-30, Gain Contingencies, or ASC 450-30.

Loans are placed on non-accrual status when principal or interest payments are past due 30 days or more and/or if there is reasonable doubt that principal or interest will be collected. Accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in management's judgment, are likely to remain current. As of March 31, 2026, we had three portfolio companies on non-accrual status, representing 0.8% and 0.5% of our overall portfolio on a cost and fair value basis, respectively. As of September 30, 2025, we had three portfolio companies on non-accrual status, representing 0.4% and 0.2% of our overall portfolio on a cost and fair value basis, respectively.

(c) Income Taxes

We have complied with the requirements of Subchapter M of the Code and have qualified to be treated as a RIC for federal income tax purposes. In this regard, we account for income taxes using the asset and liability method prescribed by ASC Topic 740, Income Taxes ("ASC 740"). Under this method, income taxes are provided for amounts currently payable and for amounts deferred as tax assets and liabilities based on differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. Based upon our qualification and election to be treated as a RIC for U.S. federal income tax purposes, we typically do not incur material U.S. federal income taxes. However, we may choose to retain a portion of our calendar year income, which may result in the imposition of a federal excise tax, or we may incur taxes through our taxable subsidiaries, including the Taxable Subsidiary.

For the three and six months ended March 31, 2026, we recorded a provision for taxes on net investment income of less than \$0.1 million and \$0.3 million, respectively, pertaining to federal excise tax. For the three and six months ended March 31, 2025, we recorded a provision for taxes on net investment income of \$0.2 million and \$0.5 million, respectively, pertaining to federal excise tax.

We recognize the effect of a tax position in our Consolidated Financial Statements in accordance with ASC 740 when it is more likely than not, based on the technical merits, that the position will be sustained upon examination by the applicable tax authority. Tax positions not considered to satisfy the "more-likely-than-not" threshold would be recorded as a tax expense or benefit. Penalties or interest, if applicable, that may be assessed relating to income taxes would be classified as other operating expenses in the financial statements. There were no tax accruals relating to uncertain tax positions and no amounts accrued for any related interest or penalties with respect to the periods presented herein. The Company's determinations regarding ASC 740 may be subject to review and adjustment at a later date based upon factors including, but

not limited to, an ongoing analysis of tax laws, regulations and interpretations thereof. Although the Company files both federal and state income tax returns, the Company's major tax jurisdiction is federal.

For the three and six months ended March 31, 2026, the Company recorded a provision for taxes of \$(0.3) million and \$0.3 million on unrealized appreciation (depreciation) on investments by the Taxable Subsidiary. For the three and six months ended March 31, 2025, the Company recorded a provision for taxes of \$0.5 million and \$1.1 million on unrealized appreciation (depreciation) on investments by the Taxable Subsidiary. The provision for taxes on unrealized appreciation (depreciation) on investments is the result of netting (i) the expected tax liability on gains from sales of investments and (ii) the expected tax benefit from the use of losses in the current year. As of March 31, 2026, and September 30, 2025, \$1.6 million and \$1.9 million, respectively, was accrued as a deferred tax liability on the Consolidated Statements of Assets and Liabilities relating to unrealized gain on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2026, the Company recorded a provision for taxes of zero, respectively, relating to realized gain (loss) on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2025, the Company recorded a provision for taxes of less than \$(0.1) million and \$(0.1) million relating to realized gain (loss) on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2026 and 2025, the Taxable Subsidiary did not make any federal tax payments on realized gains on the sale of investments held by the Taxable Subsidiary.

We operate in a manner to maintain our election to be subject to tax as a RIC and to eliminate corporate-level U.S. federal income tax (other than the 4% excise tax) by distributing sufficient investment company taxable income and capital gain net income (if any). As a result, we will have an effective tax rate equal to 0% before the excise tax and income taxes incurred by the Taxable Subsidiary. As such, a reconciliation of the differences between our reported income tax expense and its tax expense at the federal statutory rate of 21% is not meaningful.

Because federal income tax regulations differ from GAAP, distributions in accordance with tax regulations may differ from net investment income and net realized gains recognized for financial reporting purposes. Differences between tax regulations and GAAP may be permanent or temporary. Permanent differences are reclassified among capital accounts in the Consolidated Statements of Assets and Liabilities to reflect their tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future.

(d) Distributions and Capital Transactions

Distributions to holders of our common stock are recorded on the ex-dividend date. The amount to be paid, if any, as a distribution is determined by the board of directors each quarter and is generally based upon the earnings estimated by management. Net realized capital gains, if any, may be distributed at least annually. The tax attributes for distributions will generally include ordinary income and capital gains but may also include certain tax-qualified dividends and/or a return of capital.

Capital transactions through offerings of our common stock are recorded when issued and offering costs are charged as a reduction of capital upon issuance of our common stock.

On July 17, 2024, we entered into equity distribution agreements (together, the "Equity Distribution Agreements") with Citizens JMP Securities, LLC, Raymond James & Associates, Inc. and Truist Securities, Inc. as the sales agents (collectively the "Sales Agents" and each a "Sales Agent") in connection with the 2024 ATM Program. The Equity Distribution Agreements provide that we may offer and sell shares of our common stock from time to time through the Sales Agents in amounts and at times to be determined by us. Actual sales will depend on a variety of factors to be determined by us from time to time, including, market conditions and the trading price of our common stock. The Investment Adviser may, from time to time, in its sole discretion, pay some or all of the commissions payable under the Equity Distribution Agreements or make additional supplemental payments to ensure that the sales price per share of our common stock in connection with all of the 2024 ATM Program offerings, net of any commissions of the Sale Agents, will not be less than our then current NAV per share. Any such payments made by the Investment Adviser will not be subject to reimbursement by us. In connection with the entry into the Equity Distribution Agreements, the Company terminated the equity distribution agreements with each of Citizens JMP Securities LLC, Raymond James & Associates, Inc. and Truist Securities, Inc. in connection with the 2022 ATM Program.

During the three and six months ended March 31, 2026, we did not issue any shares of our common stock under the ATM Programs. During the three and six months ended March 31, 2025 we issued 11,562,000 shares and 18,838,000 shares of our common stock under the ATM Programs, respectively, at an average price of \$11.34 per share and \$11.35 per share raising \$131.0 million and \$213.2 million of net proceeds after commissions to Sales Agents (as defined below) and inclusive of proceeds from the Investment Adviser to ensure that all shares were sold at or above NAV, respectively. During the three and six months ended March 31, 2026, we did not incur any legal and other offering costs associated with establishing the ATM Programs. During the three and six months ended March 31, 2025, we incurred \$0.2 million and \$0.2 million of legal and other offering costs associated with establishing the ATM Programs. As of March 31, 2026 and September 30, 2025, we had \$192.2 million and \$192.2 million, respectively, of our common stock available to be sold under the ATM Programs.

(e) Foreign Currency Translation

Our books and records are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

1. Fair value of investment securities, other assets and liabilities – at the exchange rates prevailing at the end of the applicable period; and
2. Purchases and sales of investment securities, income and expenses – at the exchange rates prevailing on the respective dates of such transactions.

Although net assets and fair values are presented based on the applicable foreign exchange rates described above, we do not isolate that portion of the results of operations due to changes in foreign exchange rates on investments, other assets and debt from the fluctuations arising from changes in fair value of investments and liabilities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments and liabilities.

Foreign security and currency translations may involve certain considerations and risks not typically associated with investing in U.S. companies and U.S. government securities. These risks include, but are not limited to, currency fluctuations and revaluations and future adverse political, social and economic developments, which could cause investments in foreign markets to be less liquid and prices to be more volatile than those of comparable U.S. companies or U.S. government securities.

(f) Consolidation

As permitted under Regulation S-X and as explained by ASC paragraph 946-810-45-3, we will generally not consolidate our investment in a company other than an investment company wholly owned subsidiary or a controlled operating company whose business consists of providing services to us. Accordingly, we have consolidated the results of our taxable subsidiaries, including the Taxable Subsidiary, Funding I, 2036 Securitization Issuers, the 2036-R Securitization Issuers, 2037 Securitization Issuer, the

2038-R Securitization Issuers and PTSF and PTSF's GP (effective, August 27, 2025; see Note 1) in our Consolidated Financial Statements. We do not consolidate our non-controlling interest in PSSL or PSSL II. See further description of our investment in PSSL and PSSLII in Note 4.

(g) Asset Transfers and Servicing

Asset transfers that do not meet requirements for sale accounting treatment are reflected in the Consolidated Statements of Assets and Liabilities and the Consolidated Schedules of Investments as investments. The creditors of Funding I have received a security interest in all of its assets and such assets are not intended to be available to our creditors or any of our affiliates.

(h) Segment Reporting

In accordance with ASC Topic 280 - Segment Reporting, the Company has determined that it has a single reporting segment and operating unit structure. As a result, the Company's segment accounting policies are the same as described herein and the Company does not have any intra-segment sales and transfers of assets. See Note 12 for additional information on the Company's segment accounting policies.

(i) Recent Accounting Pronouncements

In November 2023, FASB issued ASU 2023-07, Segment Reporting (Topic 280), Improvements to Reportable Segment Disclosures to improve reportable segment disclosure requirements through enhanced disclosures about significant segment expenses. ASU 2023-07 expands public entities' segment disclosure by requiring disclosure of significant segment expenses that are regularly provided to the chief operating decision maker (the "CODM") and included within each reported measure of segment profit or loss, an amount and description of its composition for other segment items and interim disclosure of a reportable segment's profit or loss and assets. All disclosure requirements of ASU 2023-07 are required for entities with a single reportable segment. ASU 2023-07 is effective for fiscal years beginning after December 15, 2023, and interim periods for fiscal years beginning December 15, 2024, and should be applied on a retrospective basis to all periods presented, noting early adoption is permitted. The Company has adopted ASU 2023-07 effective September 30, 2025 and concluded that the application of this guidance did not have a material impact on its consolidated financial statements.

In December 2023, the FASB issued ASU 2023 - 09 "Improvements to Income Tax Disclosures" ("ASU 2023 - 09"). ASU 2023 - 09 intends to improve the transparency of income tax disclosures. ASU 2023 - 09 is effective for fiscal years beginning after December 15, 2024 and is to be adopted on a prospective basis with the option to apply retrospectively. We are currently assessing the impact of this guidance, however, we do not expect a material impact to our financial statements.

3. AGREEMENTS AND RELATED PARTY TRANSACTIONS

(a) Investment Management Agreement

The Investment Management Agreement was reapproved by our board of directors, including a majority of our directors who are not interested persons of us or the Investment Adviser, in May 2026. Under the Investment Management Agreement, the Investment Adviser, subject to the overall supervision of our board of directors, manages the day-to-day operations of and provides investment advisory services to us. For providing these services, the Investment Adviser receives a fee from us consisting of two components - a base management fee and an incentive fee. The Investment Adviser serves as the collateral manager to Funding I and has irrevocably directed that any management fee owed with respect to such services is to be paid to the Company so long as the Investment Adviser remains the collateral manager. This arrangement does not increase our consolidated management fee.

Base Management Fee

The base management fee is calculated at an annual rate of 1.00% of our "average adjusted gross assets," which equals our gross assets (net of U.S. Treasury Bills, temporary draws under any credit facility, cash and cash equivalents, repurchase agreements or other balance sheet transactions undertaken at the end of a fiscal quarter for purposes of preserving investment flexibility for the next quarter and unfunded commitments, if any) and is payable quarterly in arrears. The base management fee is calculated based on the average adjusted gross assets at the end of the two most recently completed calendar quarters, and appropriately adjusted for any share issuances or repurchases during the current calendar quarter. For example, if we sold shares on the 45th day of a quarter and did not use the proceeds from the sale to repay outstanding indebtedness, our gross assets for such quarter would give effect to the net proceeds of the issuance for only 45 days of the quarter during which the additional shares were outstanding. For the three and six months ended March 31, 2026, we recorded a base management fee of \$6.4 million and \$13.2 million, respectively, paid by us to the Investment Adviser. For the three and six months ended March 31, 2025, we recorded a base management fee of \$5.6 million and \$10.9 million, respectively, paid by us to the Investment Adviser.

Incentive Fee

The incentive fee has two parts, as follows:

One part is calculated and payable quarterly in arrears based on our Pre-Incentive Fee Net Investment Income for the immediately preceding calendar quarter. For this purpose, Pre-Incentive Fee Net Investment Income means interest income, dividend income and any other income, including any other fees (other than fees for providing managerial assistance), such as amendment, commitment, origination, prepayment penalties, structuring, diligence and consulting fees or other fees received from portfolio companies, accrued during the calendar quarter, minus our operating expenses for the quarter (including the base management fee, any expenses payable under the Administration Agreement and any interest expense or amendment fees under any credit facility and distribution paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-Incentive Fee Net Investment Income includes, in the case of investments with a deferred interest feature (such as OID, debt instruments with PIK interest and zero-coupon securities), accrued income not yet received in cash. Pre-Incentive Fee Net Investment Income does not include any realized capital gains, computed net of all realized capital losses or unrealized capital appreciation or depreciation. Pre-Incentive Fee Net Investment Income, expressed as a percentage of the value of our net assets at the end of the immediately preceding calendar quarter, is compared to the hurdle rate of 1.75% per quarter (7.00% annualized). We pay the Investment Adviser an incentive fee with respect to our Pre-Incentive Fee Net Investment Income in each calendar quarter as follows: (1) no incentive fee in any calendar

quarter in which our Pre-Incentive Fee Net Investment Income does not exceed the hurdle rate of 1.75%, (2) 50% of our Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the hurdle rate but is less than 2.9167% in any calendar quarter (11.67% annualized) (we refer to this portion of our Pre-Incentive Fee Net Investment Income (which exceeds the hurdle but is less than 2.9167%) as the "catch-up," which is meant to provide our Investment Adviser with 20% of our Pre-Incentive Fee Net Investment Income, as if a hurdle did not apply, if this net investment income exceeds 2.9167% in any calendar quarter), and (3) 20% of the amount of our Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.9167% in any calendar quarter. These calculations are pro-rated

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-(Continued)

(Unaudited)

for any share issuances or repurchases during the relevant quarter, if applicable. For the three and six months ended March 31, 2026, we recorded \$6.4 million and \$13.1 million, respectively, related to incentive fees on net investment income, paid by us to the Investment Adviser. For the three and six months ended March 31, 2025, we recorded \$6.3 million and \$13.8 million, respectively, related to incentive fees on net investment income, paid by us to the Investment Adviser.

The second part of the incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date) and equals 20% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. For the three and six months ended March 31, 2026 and 2025, the Company did not pay an incentive fee on capital gains.

Under GAAP, we are required to accrue a capital gains incentive fee based upon net realized capital gains and net unrealized capital appreciation and depreciation on investments held at the end of each period. In calculating the capital gains incentive fee accrual, we considered the cumulative aggregate unrealized capital appreciation in the calculation, as a capital gains incentive fee would be payable if such unrealized capital appreciation were realized, even though such unrealized capital appreciation is not permitted to be considered in calculating the fee actually payable under the Investment Management Agreement. This accrual is calculated using the aggregate cumulative realized capital gains and losses and cumulative unrealized capital appreciation or depreciation. If such amount is positive at the end of a period, then we record a capital gains incentive fee equal to 20% of such amount, less the aggregate amount of actual capital gains related to incentive fees paid in all prior years. If such amount is negative, then there is no accrual for such year. There can be no assurance that such unrealized capital appreciation will be realized in the future. The incentive fee accrued for, but not payable, under GAAP on our unrealized and realized capital gains for the three and six months ended March 31, 2026 and 2025 was zero.

(b) Administration Agreement

The Administration Agreement with the Administrator was reapproved by our board of directors, including a majority of the directors who are not interested persons of us, in May 2026. Under the Administration Agreement, the Administrator provides administrative services and office facilities to us. For providing these services, facilities and personnel, we have agreed to reimburse the Administrator for its allocable portion of overhead and other expenses incurred by the Administrator in performing its obligations under the Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Financial Officer, Chief Compliance Officer, Corporate Counsel and their respective staffs. The amount billed by the Administrator may include credits related to its administrative agreement with PSSL. The Administrator also offers, on our behalf, significant managerial assistance to portfolio companies to which we are required to offer such assistance. Reimbursement for certain of these costs is included in administrative services expenses in the Consolidated Statements of Operations. For the three and six months ended March 31, 2026, we recorded administrative expenses of \$0.7 million and \$1.4 million, related to expenses the Company incurred for services described above, respectively. For the three and six months ended March 31, 2025, we recorded administrative expenses of \$0.5 million and \$0.9 million related to expenses the Company incurred for services described above, respectively.

Under the Administration Agreement the Administrator may be reimbursed by the Company for the costs and expenses to be borne by the Company set forth above to include the costs and expenses allocable with respect to the provision of in-house legal, tax, or other professional advice and/or services to the Company, including performing due diligence on its prospective portfolio companies as deemed appropriate by the Administrator, where such in-house personnel perform services that would be paid by the Company if outside service providers provided the same services, subject to the Board's oversight.

(c) Other Related Party Transactions

The Company, the Investment Adviser and certain other affiliates have been granted an order for exemptive relief by the SEC for the Company to co-invest with other funds managed by the Investment Adviser. If we co-invest with other affiliated funds, our Investment Adviser will not receive compensation except to the extent permitted by the exemptive order and applicable law, including the limitations set forth in Section 57(k) of the 1940 Act.

There were no transactions subject to Rule 17a-7 under the 1940 Act during each of the three and six months ended March 31, 2026 and 2025.

For the three and six months ended March 31, 2026, we sold \$56.9 million and \$189.4 million in investments to PSSL at fair value, respectively, and recognized \$(0.1) million and \$0.2 million of net realized gain (losses). For the three and six months ended March 31, 2025, we sold \$52.9 million and \$240.6 million in investments to PSSL at fair value, respectively, and recognized zero and \$(0.1) million of net realized gain (losses).

For the three and six months ended March 31, 2026, we sold \$148.1 million and \$344.6 million in investments to PSSL II at fair value, respectively, and recognized \$0.5 million and \$1.0 million of net realized gain (losses). For the three and six months ended March 31, 2025, we sold zero investments to PSSL II at fair value and recognized zero net realized gain (losses).

For the three and six months ended March 31, 2026 and 2025, we sold no investments to PTSE.

As of March 31, 2026 and September 30, 2025, the Company had a receivable from the Administrator of \$0.1 million and \$0.3 million, respectively, presented as due from affiliate on the Consolidated Statements of Assets and Liabilities. This amount relates to agency fees collected on behalf of the Company.

As of March 31, 2026 and September 30, 2025, the Company had a receivable from PSSL II of \$0.9 million and zero, respectively, presented as a distribution receivable on the Consolidated Statements of Assets and Liabilities. This amount relates to a dividend distribution.

As of March 31, 2026 and September 30, 2025, PFLT had a payable to PSSL and the Investment Adviser of zero and \$0.7 million, respectively, presented as a Due to Affiliates on the consolidated statement of assets and liabilities. These amounts are related to cash owed to PSSL and the Investment Adviser from the Company in connection with trades between the funds and wind down of PTSE.

4. INVESTMENTS

For the three and six months ended March 31, 2026, purchases of investments, including payment-in-kind ("PIK") interest totaled \$296.3 million and \$599.0 million, respectively. (1) Excludes investments in PSSL and PSSL II

PennantPark Senior Secured Loan Fund I LLC

In May 2017, we and Kemper formed PSSL, an unconsolidated joint venture. PSSL invests primarily in middle-market and other corporate debt securities consistent with our strategy. PSSL was formed as a Delaware limited liability company. We and Kemper each appointed two members to PSSL's four-person board of directors and investment committee. Quorum is defined as (i) the presence of two members of the board of directors or investment committee, provided that at least one individual is present that was elected, designated or appointed by each member; (ii) the presence of three members of the board of directors or investment committee, provided that the individual that was elected, designated or appointed by the member with only one individual present shall be entitled to cast two votes on each matter; and (iii) the presence of four members of the board of directors or investment committee constitutes a quorum, provided that two individuals are present that were elected, designated or appointed by each member.

In December 2024, PSSL entered into a \$325.0 million (increased from \$260.0 million) senior secured revolving credit facility which bears interest at SOFR plus 225 basis points (including a spread adjustment) with Ally Bank through its wholly owned subsidiary, PennantPark Senior Secured Loan Facility LLC II, or PSSL Subsidiary II, subject to leverage and borrowing base restrictions.

The 2032 Asset-Backed Debt matures in January 2032. On the closing date of the transaction, in consideration of PSSL's transfer to PennantPark CLO II, Ltd. of the initial closing date loan portfolio, which included loans distributed to PSSL by certain of its wholly owned subsidiaries and us, PennantPark CLO II, Ltd. transferred to PSSL 100% of the Preferred Shares of PennantPark CLO II, Ltd. and 100% of the Class E Notes issued by PennantPark CLO II, Ltd.

5. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value, as defined under ASC 820, is the price that we would receive upon selling an investment or pay to transfer a liability in an orderly transaction to a market participant in the principal or most advantageous market for the investment or liability. ASC 820 emphasizes that valuation techniques maximize the use of observable market inputs and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing an asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of us. Unobservable inputs reflect the assumptions market participants would use in pricing an asset or liability based on the best information available to us on the reporting period date.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchies:

- Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities, accessible by us at the measurement date.
- Level 2: Inputs that are quoted prices for similar assets or liabilities in active markets, or that are quoted prices for identical or similar assets or liabilities in markets that are not active and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term, if applicable, of the financial instrument.

PENNANTPARK FLOATING RATE CAPITAL LTD. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-(Continued)
MARCH 31, 2026
(Unaudited)

Level 3: Inputs that are unobservable for an asset or liability because they are based on our own assumptions about how market participants would price the asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Generally, most of our investments, including our 2036 Asset-Backed Debt, 2036-R, Asset-Backed Debt, 2037 Asset-Backed Debt, 2038-R Asset Backed Debt and our Credit Facility are classified as Level 3. Our 2026 Notes and 2029 Notes are classified as Level 2 as they are financial instruments with readily observable market inputs. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and those differences may be material.

The inputs into the determination of fair value may require significant management judgment or estimation. Even if observable market data is available, such information may be the result of consensus pricing information, disorderly transactions or broker quotes which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimer would result in classification as Level 3 information, assuming no additional corroborating evidence was available. Corroborating evidence that would result in classifying these non-binding broker/dealer bids as a Level 2 asset includes observable orderly market-based transactions for the same or similar assets or other relevant observable market-based inputs that may be used in pricing an asset.

Our investments are generally structured as floating rate loans, mainly first lien secured debt, but also may include second lien secured debt, subordinated debt and equity investments. The transaction price, excluding transaction costs, is typically the best estimate of fair value at inception. Ongoing reviews by our Investment Adviser and independent valuation firms are based on an assessment of each underlying investment, incorporating valuations that consider the evaluation of financing and sale transactions with third parties, expected cash flows and market-based information including comparable transactions, performance multiples and yields, among other factors. These non-public investments valued using unobservable inputs are included in Level 3 of the fair value hierarchy.

A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in our ability to observe valuation inputs may result in a reclassification for certain financial assets or liabilities.

In addition to using the above inputs to value cash equivalents, investments, our 2026 Notes, our 2029 Notes, our 2036 Asset-Backed Debt, 2036-R Asset-Backed Debt, our 2037 Asset-Backed Debt, our 2038-R Asset-Backed Debt and our Credit Facility, we employ the valuation policy approved by our board of directors that is consistent with ASC 820. Consistent with our valuation policy, we evaluate the source of inputs, including any markets in which our investments are trading, in determining fair value. See Note 2.

As outlined in the table below, some of our Level 3 investments use a market-based valuation technique which values such assets using the average of the bids from brokers or dealers. The bids include a disclaimer, may not have corroborating evidence, may be the result of a disorderly transaction and may be the result of consensus pricing. The Investment Adviser assesses the source and reliability of bids from brokers or dealers. If the board of directors has a bona fide reason to believe any such bids do not reflect the fair value of an investment, it may independently value such investment by using the valuation procedure that it uses with respect to assets for which market quotations are not readily available. In accordance with ASC 820, we do not categorize any investments for which fair value is measured using net asset value per share as a practical expedient within the fair value hierarchy.

The remainder of our investment portfolio and our long-term Credit Facility are valued using a market comparable or an enterprise market value technique. With respect to investments for which there is no readily available market value, the factors that the board of directors may take into account in pricing our investments at fair value include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments, its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities, discounted for lack of marketability and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, the pricing indicated by the external event, excluding transaction costs, is used to corroborate the valuation. When using earnings multiples to value a portfolio company, the multiple used requires the use of judgment and estimates in determining how a market participant would price such an asset. These non-public investments using unobservable inputs are included in Level 3 of the fair value hierarchy. Generally, the sensitivity of unobservable inputs or combination of inputs such as industry comparable companies, market outlook, consistency, discount rates and reliability of earnings and prospects for growth, or lack thereof, affects the multiple used in pricing an investment. As a result, any change in any one of those factors may have a significant impact on the valuation of an investment. Generally, an increase in a market yield will result in a decrease in the valuation of a debt investment, while a decrease in a market yield will have the opposite effect. Generally, an increase in earnings before interest, taxes, depreciation and amortization, or EBITDA, multiple will result in an increase in the valuation of an investment, while a decrease in an EBITDA multiple will have the opposite effect.

Our Level 3 valuation techniques, unobservable inputs and ranges were categorized as follows for ASC 820 purposes (\$ in thousands):

As of March 31, 2026, we had outstanding non-U.S. dollar borrowings on our Credit Facility. The following table shows our non-U.S. dollar borrowings as of March 31, 2026 (CAD and \$ in thousands):

Foreign Currency	Amount Borrowed	Borrowing Cost	Current Value	Reset Date	Unrealized appreciation (depreciation)

As of September 30, 2025 we had outstanding non-U.S. dollar borrowings on our Credit Facility. The following table shows our non-U.S. dollar borrowings as of September 30, 2025. (CAD and \$ in thousands):

Canadian Dollar	CAD 2,000	\$ 1,455	\$ 1,437	10/1/2025	(18)

Generally, the carrying value of our consolidated financial liabilities approximates fair value. We have adopted the principles under ASC Subtopic 825-10, Financial Instruments, or ASC 825-10, which provides companies with an option to report selected financial assets and liabilities at fair value, and made an irrevocable election to apply ASC 825-10 to the Credit Facility. We elected to use the fair value option for the Credit Facility to align the measurement attributes of both our assets and liabilities while mitigating volatility in earnings from using different measurement attributes. Due to that election and in accordance with GAAP, we incurred zero and \$0.5 million of expenses relating to amendment costs on the Credit Facility for the three and six months ended March 31, 2026 and we incurred \$0.4 million relating to amendment costs on the Credit Facility during the three and six months ended March 31, 2025. ASC 825-10 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect on earnings of a company's choice to use fair value. ASC 825-10 also requires entities to display the fair value of the selected assets and liabilities on the face of the Consolidated Statements of Assets and Liabilities and changes in fair value of the Credit Facility are reported in our Consolidated Statements of Operations. We elected not to apply ASC 825-10 to any other financial assets or liabilities, including our 2026 Notes, our 2029 Notes, 2036-R Asset-Backed Debt, the 2037 Asset-Backed Debt and 2038-R Asset-Backed Debt.

For the three and six months ended March 31, 2026, the Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and less than \$0.1 million, respectively. For the three and six months ended March 31, 2025, the Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and \$0.1 million, respectively. As of March 31, 2026 and September 30, 2025, the net unrealized appreciation (depreciation) on the Credit Facility totaled approximately zero and zero, respectively. We use a nationally recognized independent valuation service to measure the fair value of the Credit Facility in a manner consistent with the valuation process that our board of directors uses to value our investments.

8. CASH AND CASH EQUIVALENTS

Cash equivalents represent cash in money market funds pending investment in longer-term portfolio holdings and for other general purposes. Our portfolio may consist of temporary investments in U.S. Treasury Bills (of varying maturities), repurchase agreements, money market funds or repurchase agreement-like treasury securities. These temporary investments with original maturities of 90 days or less are deemed cash equivalents and are included in the Consolidated Schedule of Investments. At the end of each fiscal quarter, we may take proactive steps to preserve investment flexibility for the next quarter by investing in cash equivalents, which depends upon the composition of our total assets at quarter-end. We may accomplish this in several ways, including purchasing U.S. Treasury Bills and closing out positions on a net cash basis after quarter-end, temporarily drawing down on the Credit Facility, or utilizing repurchase agreements or other balance sheet transactions as are deemed appropriate for this purpose. These amounts are excluded from average adjusted gross assets for purposes of computing the Investment Adviser's management fee. U.S. Treasury Bills with maturities greater than 60 days from the time of purchase are valued consistent with our valuation policy. As of March 31, 2026, cash and cash equivalents consisted of money market funds and non-money market fund in the amounts of \$31.4 million and \$90.4 million at fair value, respectively, for total cash and cash equivalents of \$121.9 million as shown on the Consolidated Statement of Cash Flows for the period ended March 31, 2026. As of September 30, 2025, cash and cash equivalents consisted of money market funds and non-money market fund in the amounts of \$40.7 million and \$82.0 million at fair value, respectively.

As a result, the asset coverage requirement applicable to us for senior securities was reduced from 200% (i.e., \$1 of debt outstanding for each \$1 of equity) to 150% (i.e., \$2 of debt outstanding for each \$1 of equity), effective as of April 5, 2019, subject to compliance with certain disclosure requirements. The following analysis of our financial condition and results of operations should be read in conjunction with our Consolidated Financial Statements and the related notes thereto contained elsewhere in this Report.

Overview

PennantPark Floating Rate Capital Ltd. (the "Company," "we," "our" or "us") is a business development company ("BDC") whose principal objectives are to generate both current income and capital appreciation while seeking to preserve capital by investing primarily in floating rate loans and other investments made to U.S. middle-market companies.

We believe that floating rate loans to U.S. middle-market companies offer attractive risk-reward to investors due to a limited amount of capital available for such companies. We use the term "middle-market" to refer to companies with annual revenues between \$50.0 million and \$1.0 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as "leveraged loans," "high yield" securities or "junk bonds" and are often higher risk compared

to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured floating rate loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower's capital structure and often have certain of the borrower's assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions.

Under normal market conditions, we generally expect that at least 80% of the value of our managed assets will be invested in floating rate loans and other investments bearing a variable-rate of interest. We generally expect that first lien secured debt will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including second lien secured debt and subordinated debt and, to a lesser extent, equity investments. We seek to create a carefully constructed portfolio by generally targeting an investment size between \$5.0 million and \$30.0 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base.

Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use, our debt capital, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.

Organization and Structure of PennantPark Floating Rate Capital Ltd.

The Company, a Maryland corporation organized in October 2010, is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for federal income tax purposes we elected to be treated, and intend to qualify annually, as a RIC under the Code.

We execute our investment strategy directly and through our wholly owned subsidiaries, our unconsolidated joint venture and unconsolidated limited partnership. The term "subsidiary" means entities that primarily engage in investments activities in securities or other assets that are wholly owned by us. The Company does not intend to create or acquire primary control of an entity which primarily engages in investment activities of securities or other assets other than entities wholly owned by the Company. We comply with the provisions of Section 18 of the 1940 Act governing capital structure and leverage on an aggregate basis with our subsidiaries. Our subsidiaries comply with the provisions of Section 17 of the 1940 Act related to affiliated transactions and custody. To the extent that the Company forms a subsidiary advised by an investment adviser other than the Investment Adviser, the investment adviser to such subsidiaries will comply with the provisions of the 1940 Act relating to investment advisory contracts, including but not limited to, Section 15, as if it were an investment adviser to the Company under Section 2(a)(20) of the 1940 Act.

Our investment activities are managed by the Investment Adviser. Under our Investment Management Agreement, we have agreed to pay our Investment Adviser an annual base management fee based on our average adjusted gross assets as well as an incentive fee based on our investment performance. We have also entered into an Administration Agreement with the Administrator. Under our Administration Agreement, we have agreed to reimburse the Administrator for our allocable portion of overhead and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Financial Officer, Chief Compliance Officer, Corporate Counsel and their respective staffs. Our board of directors, a majority of whom are independent of us and the Investment Adviser, provides overall supervision of our activities, and the Investment Adviser supervises our day-to-day activities.

Revenues

We generate revenue in the form of interest income on the debt securities we hold and capital gains and dividends, if any, on investment securities that we may acquire in portfolio companies. Our debt investments, whether in the form of first lien secured debt, second lien secured debt or subordinated debt, typically have a term of three to ten years and bear interest at a floating or fixed rate. Interest on debt securities is generally payable quarterly or semiannually. In some cases, our investments provide for deferred interest payments or PIK interest. The principal amount of the debt securities and any accrued but unpaid interest generally becomes due at the maturity date. In addition, we may generate revenue in the form of amendment, commitment, origination, structuring or diligence fees, fees for providing significant managerial assistance and possibly consulting fees. Loan origination fees, OID and market discount or premium are capitalized and accreted or amortized using the effective interest method as interest income or, in the case of deferred financing costs, as interest expense. Dividend income, if any, is recognized on an accrual basis on the ex-dividend date to the extent that we expect to collect such amounts. From time to time, the Company receives certain fees from portfolio companies, which may or may not be non-recurring in nature. Such fees include loan prepayment penalties, structuring fees and amendment fees and agency fees, and are recorded as other investment income when earned. Litigation settlements are accounted for in accordance with the gain contingency provisions of ASC Subtopic 450-30, Gain Contingencies, or ASC 450-30.

Expenses

Our primary operating expenses include the payment of a management fee and the payment of an incentive fee to our Investment Adviser, if any, our allocable portion of overhead under our Administration Agreement and other operating costs as detailed below. Our management fee compensates our Investment Adviser for its work in identifying, evaluating, negotiating, consummating and monitoring our investments. Additionally, we pay interest expense on the outstanding debt and unused commitment fees on undrawn amounts under our various debt facilities. We bear all other direct or indirect costs and expenses of our operations and transactions, including:

- the cost of calculating our NAV, including the cost of any third-party valuation services;
- the cost of effecting sales and repurchases of shares of our common stock and other securities;
- fees payable to third parties relating to, or associated with, making investments, including fees and expenses associated with performing due diligence and reviews of prospective investments or complementary businesses;
- expenses incurred by the Investment Adviser in performing due diligence and reviews of investments, including expenses incurred by the Investment Adviser payable to third parties, (including agents and consultants) in monitoring financial and legal affairs for the Company's and in monitoring the Company's investments.
- transfer agent and custodial fees;
- fees and expenses associated with marketing efforts;
- federal and state registration fees and any exchange listing fees;
- federal, state, local and foreign taxes;

- independent directors' fees and expenses;
- brokerage commissions;
- fidelity bond, directors and officers, errors and omissions liability insurance and other insurance premiums;
- direct costs such as printing, mailing, long distance telephone and staff;
- fees and expenses associated with independent audits and outside legal costs;
- costs associated with our reporting and compliance obligations under the 1940 Act, the 1958 Act and applicable federal and state securities laws; and
- all other expenses incurred by either the Administrator or us in connection with administering our business, including payments under our Administration Agreement that will be based upon our allocable portion of overhead, and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer, Chief Financial Officer, Corporate Counsel and their respective staffs.

Generally, during periods of asset growth, we expect our general and administrative expenses to be relatively stable or to decline as a percentage of total assets and increase during periods of asset declines. Incentive fees, interest expense and costs relating to future offerings of securities would be additive to the expenses described above.

At-the-Market Offering

On July 17, 2024, we entered into equity distribution agreements (together, the "Equity Distribution Agreements") with Citizens JMP Securities, LLC, Raymond James & Associates, Inc. and Truist Securities, Inc. as the sales agents (collectively the "Sales Agents" and each a "Sales Agent") in connection with the 2024 ATM Program. The Equity Distribution Agreements provide that we may offer and sell shares of our common stock from time to time through the Sales Agents in amounts and at times to be determined by us. Actual sales will depend on a variety of factors to be determined by us from time to time, including, market conditions and the trading price of our common stock. The Investment Adviser may, from time to time, in its sole discretion, pay some or all of the commissions payable under the Equity Distribution Agreements or make additional supplemental payments to ensure that the sales price per share of our common stock in connection with all of the 2024 ATM Program offerings, net of any commissions of the Sale Agents, will not be less than our then current NAV per share. Any such payments made by the Investment Adviser will not be subject to reimbursement by us. In connection with the entry into the Equity Distribution Agreements, the Company terminated the equity distribution agreements with each of Citizens JMP Securities LLC, Raymond James & Associates, Inc. and Truist Securities, Inc. in connection with the 2022 ATM Program.

During the three and six months ended March 31, 2026, we did not issue any shares of our common stock under the ATM Programs. During the three and six months ended March 31, 2025 we issued 11,562,000 shares and 18,838,000 shares of our common stock under the ATM Programs, respectively, at an average price of \$11.34 per share and \$11.35 per share raising \$131.0 million and \$213.2 million of net proceeds after commissions to Sales Agents (as defined below) and inclusive of proceeds from the Investment Adviser to ensure that all shares were sold at or above NAV, respectively. During the three and six months ended March 31, 2026, we did not incur any legal and other offering costs associated with establishing the ATM Programs. During the three and six months ended March 31, 2025, we incurred \$0.2 million and \$0.2 million of legal and other offering costs associated with establishing the ATM Programs. As of March 31, 2026 and September 30, 2025, we had \$192.2 million and \$192.2 million, respectively, of our common stock available to be sold under the ATM Programs.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of our assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of income and expenses during the reported periods. In the opinion of management, all adjustments, which are of a normal recurring nature, considered necessary for the fair presentation of financial statements have been included. Actual results could differ from these estimates due to changes in the economic and regulatory environment, financial markets and any other parameters used in determining such estimates and assumptions. We may reclassify certain prior period amounts to conform to the current period presentation. We have eliminated all intercompany balances and transactions. References to ASC serve as a single source of accounting literature. Subsequent events are evaluated and disclosed as appropriate for events occurring through the date the Consolidated Financial Statements are issued. In addition to the discussion below, we describe our critical accounting policies in the notes to our Consolidated Financial Statements. We discuss our critical accounting estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2025 Annual Report on Form 10-K. There have been no significant changes in our critical accounting estimates from those disclosed in our 2025 Annual Report on Form 10-K during the three months ended March 31, 2026.

Investment Valuations

We expect that there may not be readily available market values for many of our investments which are or will be in our portfolio, and we value such investments at fair value as determined in good faith by or under the direction of our board of directors using a documented valuation policy and a consistently applied valuation process, as described in this Report. With respect to investments for which there are no readily available market values, the factors that the board of directors may take into account in pricing our investments at fair value include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we consider the pricing indicated by the external event to corroborate or revise our valuation. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and the difference may be material.

Our portfolio generally consists of illiquid securities, including debt and equity investments. With respect to investments for which market quotations are not readily available, or for which market quotations are deemed not reflective of the fair value, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- (1) Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our Investment Adviser responsible for the portfolio investment;
- (2) Preliminary valuation conclusions are then documented and discussed with the management of our Investment Adviser;
- (3) Our board of directors also engages independent valuation firms to conduct independent appraisals of our investments for which market quotations are not readily available or are readily available but deemed not reflective of the fair value of the investment. The independent valuation firms review management's preliminary valuations in light of their own independent assessment and also in light of any market quotations obtained from an independent pricing service, broker, dealer or market maker;
- (4) The audit committee of our board of directors reviews the valuations of our Investment Adviser and those of the independent valuation firms on a quarterly basis, periodically assesses the valuation methodologies of the independent valuation firms, and responds to and supplements the valuation recommendations of the independent valuation firms to reflect any comments; and
- (5) Our board of directors discusses these valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our Investment Adviser, the respective independent valuation firms and the audit committee.

Our board of directors generally uses market quotations to assess the value of our investments for which market quotations are readily available. We obtain these market values from independent pricing services or at the bid prices obtained from at least two brokers or dealers, if available, or otherwise from a principal market maker or a primary market dealer. The Investment Adviser assesses the source and reliability of bids from brokers or dealers. If the board of directors has a bona fide reason to believe any such market quote does not reflect the fair value of an investment, it may independently value such investments by using the valuation procedure that it uses with respect to assets for which market quotations are not readily available.

Fair value, as defined under ASC 820, is the price that we would receive upon selling an investment or pay to transfer a liability in an orderly transaction to a market participant in the principal or most advantageous market for the investment or liability. ASC 820 emphasizes that valuation techniques maximize the use of observable market inputs and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing an asset or liability, including

assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of us. Unobservable inputs reflect the assumptions market participants would use in pricing an asset or liability based on the best information available to us on the reporting period date.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchies:

Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities, accessible by us at the measurement date.

Level 2: Inputs that are quoted prices for similar assets or liabilities in active markets, or that are quoted prices for identical or similar assets or liabilities in markets that are not active and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term, if applicable, of the financial instrument.

Level 3: Inputs that are unobservable for an asset or liability because they are based on our own assumptions about how market participants would price the asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Generally, most of our investments, our 2036 Asset-Backed Debt, our 2036-R Asset-Backed Debt, 2037 Asset-Backed Debt, 2038-R Asset-Backed Debt and our Credit Facility are classified as Level 3. Our 2026 Notes and 2029 Notes are classified as Level 2 as they are financial instruments with readily observable market inputs. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and those differences may be material.

On December 3, 2020, the SEC adopted Rule 2a-5 under the 1940 Act, which establishes an updated regulatory framework for determining fair value in good faith for purposes of the 1940 Act. The new rule clarifies how fund boards of directors can satisfy their valuation obligations and requires, among other things, the boards of directors to assess periodically material valuation risks and take steps to manage those risks. The rule also permits boards of directors, subject to board oversight and certain other conditions, to designate the fund's investment adviser to perform fair value determinations. The new rule went into effect on March 8, 2021 and had a compliance date of September 8, 2022. We came into compliance with Rule 2a-5 under the 1940 Act before the compliance date. While our board of directors has not elected to designate the Investment Adviser as the valuation designee as of the date of this report, we have adopted certain revisions to our valuation policies and procedures in order to comply with the applicable requirements of Rule 2a-5 under the 1940 Act.

In addition to using the above inputs to value cash equivalents, investments, our 2026 Notes, our 2029 Notes, our 2036 Asset-Backed Debt, our 2036-R Asset-Backed Debt, our 2037 Asset-Backed Debt, our 2038-R Asset-Backed Debt, and our Credit Facility, we employ the valuation policy approved by our board of directors that is consistent with ASC 820. Consistent with our valuation policy, we evaluate the source of inputs, including any markets in which our investments are trading, in determining fair value.

Generally, the carrying value of our consolidated financial liabilities approximates fair value. We have adopted the principles ASC Subtopic 825-10, Financial Instruments, or ASC 825-10, which provides companies with an option to report selected financial assets and liabilities at fair value, and made an irrevocable election to apply ASC 825-10 to the Credit Facility. We elected to use the fair value option for the Credit Facility to align the measurement attributes of both our assets and liabilities while mitigating volatility in earnings from using different measurement attributes. Due to that election and in accordance with GAAP, we incurred zero and \$0.5 million of expenses relating to amendment costs on the Credit Facility during the three and six months ended March 31, 2026 and we incurred \$0.4 million of expenses relating to amendment costs on the Credit Facility during the three and six months ended, March 31, 2025. ASC 825-10 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect on earnings of a company's choice to use fair value. ASC 825-10 also requires entities to display the fair value of the selected assets and liabilities on the face of the Consolidated Statements of Assets and Liabilities and changes in fair value of the Credit Facility are reported in our Consolidated Statements of Operations. We elected not to apply ASC 825-10 to any other financial assets or liabilities, including the 2026 Notes, 2029 Notes, the 2036 Asset-Backed Debt, the 2036-R Asset-Backed Debt, the 2037 Asset-Backed Debt and the 2038-R Asset-Backed Debt.

For the three and six months ended March 31, 2026, the Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and less than \$0.1 million. For the three and six months ended March 31, 2025, the Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and \$0.1 million. As of March 31, 2026 and September 30, 2025, the net unrealized appreciation (depreciation) on the Credit Facility totaled approximately zero and zero, respectively. We use a nationally recognized independent valuation service to measure the fair value of the Credit Facility in a manner consistent with the valuation process that our board of directors uses to value our investments.

Revenue Recognition

We record interest income on an accrual basis to the extent that we expect to collect such amounts. For loans and debt investments with contractual PIK interest, which represents interest accrued and added to the loan balance that generally becomes due at maturity, we will generally not accrue PIK interest when the portfolio company valuation indicates that such PIK interest is not collectable. We do not accrue as a receivable interest on loans and debt investments if we have reason to doubt our ability to collect such interest. Loan origination fees, OID, market discount or premium and deferred financing costs on liabilities, which we do not fair value, are capitalized and then accreted or amortized using the effective interest method as interest income or, in the case of deferred financing costs, as interest expense. We record prepayment penalties on loans and debt investments as income. Dividend income, if any, is recognized on an accrual basis on the ex-dividend date to the extent that we expect to collect such amounts. From time to time, the Company receives certain fees from portfolio companies, which may or may not be non-recurring in nature. Such fees include loan prepayment penalties, structuring fees, amendment fees and agency fees, and are recorded as other investment income when earned.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

We measure realized gains or losses by the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment, using the specific identification method, without regard to unrealized appreciation or depreciation previously recognized, but considering unamortized upfront fees and prepayment penalties. Net change in unrealized appreciation or depreciation reflects the change in the fair values of our portfolio investments, our Credit Facility, during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

Foreign Currency Translation

Our books and records are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

1. Fair value of investment securities, other assets and liabilities – at the exchange rates prevailing at the end of the applicable period; and
2. Purchases and sales of investment securities, income and expenses – at the exchange rates prevailing on the respective dates of such transactions.

Although net assets and fair values are presented based on the applicable foreign exchange rates described above, we do not isolate that portion of the results of operations due to changes in foreign exchange rates on investments, other assets and debt from the fluctuations arising from changes in fair value of investments and liabilities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments and liabilities.

Payment -in-kind, or PIK Interest

We have investments in our portfolio which contain a PIK interest provision. PIK interest is added to the principal balance of the investment and is recorded as income. In order for us to maintain our ability to be subject to tax as a RIC, substantially all of this income must be paid out to stockholders in the form of dividends for federal income tax purposes, even though we may not have collected any cash with respect to interest on PIK securities.

Federal Income Taxes

We have elected to be treated and intend to qualify annually to maintain our election to be treated, as a RIC under Subchapter M of the Code. To maintain our RIC tax election, we must, among other requirements, meet certain annual source-of-income and quarterly asset diversification requirements. We also must annually distribute dividends for federal income tax purposes to our stockholders out of the assets legally available for distribution of an amount generally at least equal to 90% of the sum of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, or investment company taxable income, determined without regard to any deduction for dividends paid.

Although not required for us to maintain our RIC tax status, in order to preclude the imposition of a 4% nondeductible federal excise tax imposed on RICs, we must distribute dividends for U.S. federal income tax purposes to our stockholders in respect of each calendar year of an amount at least equal to the sum of (1) 98% of our net ordinary income (subject to certain deferrals and elections) for the calendar year, (2) 98.2% of our capital gain net income (i.e., the excess, if any, of our capital gains over capital losses), adjusted for certain ordinary losses, generally for the one-year period ending on October 31 of the calendar year plus (3) any net ordinary income or capital gain net income for the preceding years that was not distributed during such years on which we did not incur any corporate income tax, or the Excise Tax Avoidance Requirement. In addition, although we may distribute realized net capital gains (i.e., net long-term capital gains in excess of net short-term capital losses), if any, at least annually, out of the assets legally available for such distributions in the manner described above, we have retained and may continue to retain such net capital gains or investment company taxable income, subject to maintaining our ability to be taxed as a RIC, in order to provide us with additional liquidity.

Because federal income tax regulations differ from GAAP, distributions in accordance with tax regulations may differ from net investment income and net realized gain recognized for financial reporting purposes. Differences between tax regulations and GAAP may be permanent or temporary. Permanent differences are reclassified among capital accounts in the Consolidated Financial Statements to reflect their appropriate tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future.

For the three and six months ended March 31, 2026, we recorded a provision for taxes on net investment income of less than \$0.1 million and \$0.3 million pertaining to federal excise tax. For the three and six months ended March 31, 2025, we recorded a provision for taxes on net investment income of \$0.2 million and \$0.5 million pertaining to federal excise tax.

On February 4, 2022, we formed PFLT Investment Holdings II, LLC, a Delaware limited liability company ("Holdings II"), as a wholly owned subsidiary. On December 31, 2022, we contributed 100% of our interests in PFLT Investment Holdings, LLC ("Holdings") to Holdings II. Effective as of January 1, 2024, Holdings II elected to be treated as a corporation for U.S. federal income tax purposes. On January 3, 2024, we purchased an equity interest in Holdings from Holdings II and Holdings became a partnership for U.S. federal income tax purposes. The Company and Holdings II entered into a limited liability company agreement with respect to Holdings that provides for certain payments and the sharing of income, gain, loss and deductions attributable to Holdings' investments.

For the three and six months ended March 31, 2026, the Company recorded a provision for taxes of \$(0.3) million and \$0.3 million on unrealized appreciation (depreciation) on investments by the Taxable Subsidiary. For the three and six months ended March 31, 2025, the Company recorded a provision for taxes of \$0.5 million and \$1.1 million on unrealized appreciation (depreciation) on investments by the Taxable Subsidiary. The provision for taxes on unrealized appreciation (depreciation) on investments is the result of netting (i) the expected tax liability on gains from sales of investments and (ii) the expected tax benefit from the use of losses in the current year. As of March 31, 2026, and September 30, 2025, \$1.6 million and \$1.9 million, respectively, was accrued as a deferred tax liability on the Consolidated Statements of Assets and Liabilities relating to unrealized gain on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2026, the Company recorded a provision for taxes of zero, respectively, relating to realized gain (loss) on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2025, the Company recorded a provision for taxes of less than \$(0.1) million and \$(0.1) million relating to realized gain (loss) on investments held by the Taxable Subsidiary. During the three and six months ended March 31, 2026 and 2025, the Taxable Subsidiary did not make any federal tax payments on realized gains on the sale of investments held by the Taxable Subsidiary.

We operate in a manner to maintain our election to be subject to tax as a RIC and to eliminate corporate-level U.S. federal income tax (other than the 4% excise tax) by distributing sufficient investment company taxable income and capital gain net income (if any). As a result, we will have an effective tax rate equal to 0% before the excise tax and income taxes incurred by the Taxable Subsidiary. As such, a reconciliation of the differences between our reported income tax expense and its tax expense at the federal statutory rate of 21% is not meaningful.

We have formed and expect to continue to form certain taxable subsidiaries, including the Taxable Subsidiary, which are taxed as corporations. These taxable subsidiaries allow us to hold equity securities of certain portfolio companies treated as pass-through entities for U.S. federal income tax purposes while facilitating our ability to qualify as a RIC under the Code.

RESULTS OF OPERATIONS

Set forth below are the results of operations for the three and six months ended March 31, 2026 and 2025.

Investment Income

For the three and six months ended March 31, 2026, investment income was \$66.0 million and \$136.0 million, respectively, which was attributable to \$58.6 million and \$122.9 million from first lien secured debt and \$7.3 million and \$13.2 million from other investments, respectively. For the three and six months ended March 31, 2025, investment income was \$61.9 million and \$128.9 million, respectively, which was attributable to \$56.2 million and \$117.2 million from first lien secured debt and \$5.7 million and \$11.7 million from other investments, respectively. The increase in investment income for the three and six months ended March 31, 2026, was primarily due to the increase in the size of our debt portfolio.

Expenses

For the three and six months ended March 31, 2026, expenses totaled \$40.2 million and \$83.7 million, respectively, and were comprised of: \$24.1 million and \$51.3 million of debt related interest and expenses, \$6.4 million and \$13.2 million of base management fees, \$6.4 million and \$13.1 million of performance-based incentive fees, \$2.1 million and \$4.2 million of general and administrative expenses, less than \$0.1 million and \$0.3 million of taxes and \$1.1 million and \$1.6 million in Credit Facility amendment and debt issuance costs. For the three and six months ended March 31, 2025, expenses totaled \$36.9 million and \$74.0 million, respectively, and were comprised of: \$22.5 million and \$44.9 million of debt related interest and expenses, \$5.6 million and \$10.9 million of base management fee, \$6.3 million and \$13.8 million of performance-based incentive fee, \$1.9 million and \$3.6 million of general and administrative expenses, \$0.2 million and \$0.5 million of taxes, and \$0.4 million and \$0.4 million in Credit Facility amendment costs. The increase in expenses for the three and six months ended March 31, 2026, was primarily due to the increase in interest expense from increased borrowings as a result of the increase in our investment portfolio.

Net Investment Income

For the three and six months ended March 31, 2026, net investment income totaled \$25.8 million or \$0.26 per share, and \$52.4 million or \$0.53 per share, respectively. For the three and six months ended March 31, 2025, net investment income totaled \$25.0 million or \$0.28 per share, and \$55.0 million or \$0.64 per share, respectively. The decrease in net investment income for the three and six months ended March 31, 2026, was primarily due to an increase in interest expense and one time credit facility amendment and debt issuance costs.

Net Realized Gains or Losses

For the three and six months ended March 31, 2026, net realized gains (losses) totaled \$(8.9) million and \$(7.5) million, respectively. For the three and six months ended March 31, 2025, net realized gains (losses) totaled \$(3.5) million and \$23.1 million, respectively. The change in net realized gains (losses) was primarily due to changes in the market conditions of our investments and the values at which investments were realized.

Unrealized Appreciation or Depreciation on Investments and Debt

For the three and six months ended March 31, 2026, we reported net change in unrealized appreciation (depreciation) on investments of \$12.2 million and \$(20.1) million, respectively. For the three and six months ended March 31, 2025, we reported net change in unrealized appreciation (depreciation) on investments of \$(20.8) million and \$(49.7) million, respectively. As of March 31, 2026 and September 30, 2025, our net unrealized appreciation (depreciation) on investments totaled \$(66.1) million and \$(46.1) million, respectively. The net change in unrealized appreciation (depreciation) on our investments was primarily due to the operating performance of the portfolio companies within our portfolio, changes in the capital market conditions of our investments, and realization of investments.

For the three and six months ended March 31, 2026, our Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and less than \$0.1 million, respectively. For the three and six months ended March 31, 2025, our Credit Facility had a net change in unrealized appreciation (depreciation) of less than \$0.1 million and \$0.1 million, respectively. As of March 31, 2026 and September 30, 2025, the net unrealized appreciation (depreciation) on the Credit Facility totaled approximately zero and zero, respectively. The net change in net unrealized (appreciation) or depreciation was primarily due to changes in the capital markets.

Net Change in Net Assets Resulting from Operations

For the three and six months ended March 31, 2026, net increase (decrease) in net assets resulting from operations totaled \$28.7 million or \$0.29 per share and \$25.2 million or \$0.25 per share, respectively. For the three and six months ended March 31, 2025, net increase (decrease) in net assets resulting from operations totaled \$1.2 million or \$0.01 per share and \$29.6 million or \$0.34 per share, respectively. The net increase or (decrease) from operations for the three and six months ended March 31, 2026, was primarily due to operating performance of our portfolio and changes in capital market conditions of our investments along with change in size and cost yield of our debt portfolio and costs of financing.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity and capital resources are derived primarily from cash flows from operations, including income earned on our investments, proceeds from investment sales and repayments, and proceeds of securities offerings and debt financings. Our primary use of funds from operations includes investments in portfolio companies and payments of fees and other operating expenses we incur. We have used, and expect to continue to use, our debt capital, proceeds from our portfolio and proceeds from public and private offerings of securities to finance our investment objectives and operations. As of March 31, 2026, in accordance with the 1940 Act, with certain limited exceptions, we were only allowed to borrow amounts such that we were in compliance with a 150% asset coverage ratio requirement after such borrowing.

On April 5, 2018, our board of directors approved the application of the modified asset coverage requirements set forth in Section 61(a)(2) of the 1940 Act, as amended by the Consolidated Appropriations Act of 2018 (which includes the SBCAA). As a result, the asset coverage requirement applicable to us for senior securities was reduced from 200% (i.e., \$1 of debt outstanding for each \$1 of equity) to 150% (i.e., \$2 of debt outstanding for each \$1 of equity), effective as of April 5, 2019, subject to compliance with certain disclosure requirements. As of March 31, 2026 and September 30, 2025, our asset coverage ratio, as computed in accordance with the 1940 Act, was 162% and 160%, respectively.

As of March 31, 2026, the Credit Facility had commitments \$768.0 million (increased from \$718.0 million in November 2025) and an interest rate spread above SOFR (or an alternative risk-free floating interest rate index) of 200 basis points, a maturity date of August 2030 and a revolving period that ends in August 2028. As of March 31, 2026 and September 30, 2025, Funding I had \$328.3 million and \$683.9 million of outstanding borrowings under the Credit Facility, respectively. The Credit Facility had a weighted average interest rate of 5.7% and 6.3%, exclusive of the fee on undrawn commitments as of March 31, 2026 and September 30, 2025, respectively.

For the six months ended March 31, 2026 and 2025, the annualized weighted average cost of debt, inclusive of the fee on the undrawn commitment on the Credit Facility, amendment costs and debt issuance costs, was 6.1% and 6.8%, respectively. As of March 31, 2026 and September 30, 2025, we had \$439.7 million and \$34.1 million of unused borrowing capacity under the Credit Facility, respectively, subject to leverage and borrowing base restrictions.

In April 2025, the Credit Facility was amended. The terms of the amendment decreased the aggregate commitment amounts of the lenders party to the Credit Facility from \$736.0 million to \$718.0 million, decreased pricing under the Credit Facility to SOFR plus 200 basis points from SOFR plus 225 basis points, extended the reinvestment period one year to August 2028 from August 2027, extended the maturity date one year to August 2030 from August 2029, and increased the maximum first lien advance rate to 72.5% from 70.0%.

In November 2025, the Credit Facility was amended. The terms of the amendment increased the aggregate commitment amounts of the lenders party to the Credit Facility from \$718.0 million to \$768.0 million, pricing under the Credit Facility remains at SOFR plus 200 basis points.

The Credit Facility contains covenants, including but not limited to, restrictions of loan size, currency types and amounts, industry requirements, average life of loans, geographic and individual portfolio concentrations, minimum portfolio yield and loan payment frequency. Additionally, the Credit Facility requires the maintenance of a

minimum equity investment in Funding I and income ratio as well as restrictions on certain payments and issuance of debt. The Credit Facility compliance reporting is prepared on a basis of accounting other than GAAP. As of March 31, 2026, we were in compliance with the covenants relating to our Credit Facility.

We own 100% of the equity interest in Funding I and treat the indebtedness of Funding I as our leverage. Our Investment Adviser serves as collateral manager to Funding I under the Credit Facility.

Our interest in Funding I (other than the management fee) is subordinate in priority of payment to every other obligation of Funding I and is subject to certain payment restrictions set forth in the Credit Facility. We may receive cash distributions on our equity interests in Funding I only after it has made (1) all required cash interest and, if applicable, principal payments to the Lenders, (2) required administrative expenses and (3) claims of other unsecured creditors of Funding I. We cannot assure you that there will be sufficient funds available to make any distributions to us or that such distributions will meet our expectations from Funding I. The Investment Adviser has irrevocably directed that the management fee owed with respect to such services is to be paid to the Company so long as the Investment Adviser remains the collateral manager.

The Equity Distribution Agreements provide that we may offer and sell shares of our common stock from time to time through the Sales Agents in amounts and at times to be determined by us. Actual sales will depend on a variety of factors to be determined by us from time to time, including, market conditions and the trading price of our common stock. The Investment Adviser may, from time to time, in its sole discretion, pay some or all of the commissions payable under the Equity Distribution Agreements or make additional supplemental payments to ensure that the sales price per share of our common stock in connection with all of the 2024 ATM Program offerings, net of any commissions of the Sale Agents, will not be less than our then current NAV per share. Any such payments made by the Investment Adviser will not be subject to reimbursement by us. In connection with the entry into the Equity Distribution Agreements, the Company terminated the equity distribution agreements with each of Citizens JMP Securities LLC, Raymond James & Associates, Inc. and Truist Securities, Inc. in connection with the 2022 ATM Program.

We may raise equity or debt capital through both registered offerings off our shelf registration statement and private offerings of securities, securitizing a portion of our investments among other considerations or mergers and acquisitions. Furthermore, the Credit Facility availability depends on various covenants and restrictions as discussed in the preceding paragraphs. The primary use of existing funds and any funds raised in the future is expected to be for repayment of indebtedness, investments in portfolio companies, cash distributions to our stockholders or for other general corporate purposes.

We have entered into certain contracts under which we have material future commitments. Under our Investment Management Agreement, which was most recently reapproved by our board of directors, including a majority of our directors who are not interested persons of us or the Investment Adviser, in May 2026, PennantPark Investment Advisers serves as our investment adviser. Payments under our Investment Management Agreement in each reporting period are equal to (1) a management fee equal to a percentage of the value of our average adjusted gross assets and (2) an incentive fee based on our performance.

Under our Administration Agreement, which was most recently reapproved by our board of directors, including a majority of our directors who are not interested persons of us, in May 2026, the Administrator furnishes us with office facilities and administrative services necessary to conduct our day-to-day operations. If requested to provide significant managerial assistance to our portfolio companies, we or the Administrator will be paid an additional amount based on the services provided. Payment under our Administration Agreement is based upon our allocable portion of the Administrator's overhead in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of our Chief Financial Officer, Chief Compliance Officer, Corporate Counsel and their respective staffs.

If any of our contractual obligations discussed above are terminated, our costs under new agreements that we enter into may increase. In addition, we will likely incur significant time and expense in locating alternative parties to provide the services we expect to receive under our Investment Management Agreement and our Administration Agreement. Any new investment management agreement would also be subject to approval by our stockholders.

As of March 31, 2026 and September 30, 2025, we had cash and cash equivalents of \$121.9 million and \$122.7 million, respectively, available for investing and general corporate purposes. We believe our liquidity and capital resources are sufficient to take advantage of market opportunities.

The 2036 PSSSL Asset-Backed Debt matures in April 2036. PSSSL retained the preferred shares and Class E-R Notes through a consolidated subsidiary as of March 31, 2026.

In April 2023, PSSSL completed a \$297.8 million debt securitization in the form of a collateralized loan obligation, or the "2035 Asset-Backed Debt". The 2035 Asset-Backed Debt is secured by a carefully constructed portfolio of PennantPark CLO VI, LLC, a wholly owned and consolidated subsidiary of PSSSL, consisting primarily of middle market loans and participation interests in middle market loans. The 2035 Asset-Backed Debt matures in April 2035. On the closing date of the transaction, in consideration of PSSSL's transfer to PennantPark CLO VI, LLC of the initial closing date loan portfolio, which included loans distributed to PSSSL by certain of its wholly owned subsidiaries and us, PennantPark CLO VI, LLC transferred to PSSSL 100% of the Preferred Shares of CLO VI, LLC, all of which were held by PSSSL.

In May 2025, PSSSL through its wholly owned and consolidated subsidiary, PennantPark CLO VI, LLC closed the refinancing of the 2035 Asset-Backed Debt through a four year reinvestment period, twelve-year final maturity \$315.8 million debt securitization or the "2037-R Asset-Backed Debt." The debt in this securitization is structured in the following manner: (i) \$228.0 million of Class A-R Loans, which bears interest at three-month SOFR plus 1.85%, (ii) \$18.0 million of Class B-R Loans, which bears interest at three-month SOFR plus 4.50%, (iii) \$18.0 million of Class C-R Loans and (iv) \$51.8 million of subordinated notes. PSSSL will continue to retain all of the subordinated notes and Class C-R Loans through a consolidated subsidiary. The maturity of the replacement debt and existing subordinated notes is now extended to April 2037.

In April 2025, PSSSL through its wholly owned and consolidated subsidiary, PennantPark CLO 12, LLC closed a four-year reinvestment period, twelve-year final maturity \$301 million debt securitization in the form of a collateralized loan obligation or the "2037 Asset-Backed Debt." The debt in this securitization is structured in the following manner: (i) \$30.0 million of Class A-1 Loans, which bear interest at three-month SOFR plus 1.45%, (ii) \$141.0 million of Class A-1 Notes, which bear interest at three-month SOFR plus 1.45%, (iii) \$12.0 million of Class A-2 Notes, which bear interest at a three-month SOFR plus 1.60%, (iv) \$21.0 million of Class B notes, which bears interest at three-month SOFR plus 1.85%, (v) \$24.0 million of Class C notes, which bears interest at three-month SOFR plus 2.30%, (vi) \$18.0 million Class D notes, which bears interest at three-month SOFR plus 3.30%, (vii) \$55.0 million of subordinated notes. PSSSL will continue to retain all of the subordinated notes through a consolidated subsidiary. The reinvestment period for the term debt securitization ends in April 2029 and the debt is scheduled to mature in April 2037. The proceeds from the debt repaid a portion of PSSSL's \$325 million secured credit facility.

Off-Balance Sheet Arrangements

We currently engage in no off-balance sheet arrangements other than our funding requirements for the unfunded investments described above.

Distributions

In order to be treated as a RIC for federal income tax purposes and to not be subject to corporate-level tax on undistributed income or gains, we are required, under Subchapter M of the Code, to annually distribute dividends for U.S. federal income tax purposes to our stockholders out of the assets legally available for distribution of an amount generally at least equal to 90% of our investment company taxable income, determined without regard to any deduction for dividends paid.

Although not required for us to maintain our RIC tax status, in order to preclude the imposition of a 4% nondeductible federal excise tax imposed on RICs, we must distribute dividends for federal income tax purposes to our stockholders in respect of each calendar year an amount at least equal to the Excise Tax Avoidance Requirement. In addition, although we may distribute realized net capital gains (i.e., net long-term capital gains in excess of net short-term capital losses), if any, at least annually, out of the assets legally available for such distributions in the manner described above, we have retained and may continue to retain such net capital gains or investment company taxable income, subject to maintaining our ability to be taxed as a RIC, in order to provide us with additional liquidity.

During the three and six months ended March 31, 2026, we declared distributions of \$0.3075 and \$0.615 per share for total distributions of \$30.5 million and \$61.0 million, respectively. During the three and six months ended March 31, 2025, we declared distributions of \$0.3075 and \$0.615 per share for total distributions of \$27.7 million and \$52.9 million, respectively. We monitor available net investment income to determine if a return of capital for tax purposes may occur for the fiscal year. To the extent our taxable earnings fall below the total amount of our distributions for any given fiscal year, stockholders will be notified of the portion of those distributions deemed to be a tax return of capital. Tax characteristics of all distributions will be reported to stockholders subject to information reporting on Form 1099-DIV after the end of each calendar year and in our periodic reports filed with the SEC.

We intend to continue to make monthly distributions to our stockholders. Our monthly distributions, if any, are determined by our board of directors quarterly.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage ratio for borrowings applicable to us as a BDC under the 1940 Act and due to provisions in future credit facilities. If we do not distribute at least a certain percentage of our income annually, we could suffer adverse tax consequences, including possible loss of our ability to be subject to tax as a RIC. We cannot assure stockholders that they will receive any distributions at a particular level.

Recent Accounting Pronouncements

In November 2023, FASB issued ASU 2023-07, Segment Reporting (Topic 280), Improvements to Reportable Segment Disclosures to improve reportable segment disclosure requirements through enhanced disclosures about significant segment expenses. ASU 2023-07 expands public entities' segment disclosure by requiring disclosure of significant segment expenses that are regularly provided to the chief operating decision maker and included within each reported measure of segment profit or loss, an amount and description of its composition for other segment items and interim disclosure of a reportable segment's profit or loss and assets. All disclosure requirements of ASU 2023-07 are required for entities with a single reportable segment. ASU 2023-07 is effective for fiscal years beginning after December 15, 2023, and interim periods for fiscal years beginning December 15, 2024, and should be applied on a retrospective basis to all periods presented, noting early adoption is permitted. The Company has adopted ASU 2023-07 effective September 30, 2025 and concluded that the application of this guidance did not have a material impact on its consolidated financial statements.

In December 2023, the FASB issued ASU 2023 - 09 "Improvements to Income Tax Disclosures" ("ASU 2023 - 09"). ASU 2023 - 09 intends to improve the transparency of income tax disclosures. ASU 2023 - 09 is effective for fiscal years beginning after December 15, 2024 and is to be adopted on a prospective basis with the option to apply retrospectively. We are currently assessing the impact of this guidance, however, we do not expect a material impact to our financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are subject to financial market risks, including changes in interest rates. As of March 31, 2026, our debt portfolio consisted of approximately 99% variable-rate investments. The variable-rate loans are usually based on a SOFR (or an alternative risk-free floating interest rate index) rate and typically have durations of three months, after which they reset to current market interest rates. Variable-rate investments subject to a floor generally reset by reference to the current market index after one to nine months only if the index exceeds the floor. In regards to variable-rate instruments with a floor, we do not benefit from increases in interest rates until such rates exceed the floor and thereafter benefit from market rates above any such floor. In contrast, our cost of funds, to the extent it is not fixed, will fluctuate with changes in interest rates since it has no floor.

Assuming that the most recent Consolidated Statements of Assets and Liabilities was to remain constant, and no actions were taken to alter the existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates:

Change in Interest Rates	Change in Interest Income, Net of Interest Expense (in thousands)	Change in Interest Income, Net of Interest Expense Per Share
Down 3%	\$ (23,770)	\$ (0.24)
Down 2%	(19,690)	(0.20)
Down 1%	(9,845)	(0.10)
Up 1%	9,845	0.10
Up 2%	19,690	0.20
Up 3%	29,535	0.30

Although management believes that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in the credit market, credit quality, size and composition of the assets on the Consolidated Statements of Assets and Liabilities and other business developments that could affect net increase in net assets resulting from operations or net investment income. Accordingly, no assurances can be given that actual results would not differ materially from those shown above.

Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds, as well as our level of leverage. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income or net assets.

We may hedge against interest rate and foreign currency fluctuations by using standard hedging instruments such as futures, options and forward contracts or our Credit Facility subject to the requirements of the 1940 Act and applicable commodities laws. While hedging activities may insulate us against adverse changes in interest rates and

foreign currencies, they may also limit our ability to participate in benefits of lower interest rates or higher exchange rates with respect to our portfolio of investments with fixed interest rates or investments denominated in foreign currencies. During the periods covered by this Report, we did not engage in interest rate hedging activities or foreign currency derivatives hedging activities.

Item 4. Controls and Procedures

As of the period ended March 31, 2026, we, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13-a-15(e) of the Exchange Act). As disclosed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2025, a material weakness was previously identified in the operation of controls related to our quarterly review of equity investment valuations with respect to the allocation of value of the portfolio company to the Company's holdings. We have taken steps to remediate this material weakness, which steps have included (i) enhancing existing review controls of equity investments related to the allocation of the portfolio company's enterprise value to the Company's holdings to ensure allocations are consistent with the relevant and respective source document and (ii) enhancing policies and procedures to demonstrate a commitment to improving our overall control environment.

Taking the above efforts into consideration, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures for the period ended March 31, 2026 were effective and provided reasonable assurance that information required to be disclosed in our periodic filings with the SEC is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of such possible controls and procedures.

Other than disclosed in this Item 4, there have been no changes in our internal controls over financial reporting that occurred during the quarter ended March 31, 2026 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Neither us, our Investment Adviser or our Administrator, is currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us, or against our Investment Adviser or Administrator. From time to time, we, our Investment Adviser or Administrator, may be a party to certain legal proceedings, including proceedings relating to the enforcement of our rights under contracts with our portfolio companies. While the outcome of these and any future legal proceedings cannot be predicted with certainty, we do not expect that these proceedings will have a material effect upon our financial condition or results of operations.

Item 1A. Risk Factors

In addition to the other information set forth in this Report, you should consider carefully the factors discussed below, as well as in Part I “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended September 30, 2025 filed on November 24, 2025, which could materially affect our business, financial condition and/or operating results. The risks described as in our Annual Report on Form 10-K are not the only risks facing PennantPark Floating Rate Capital Ltd. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and/or operating results.

Middle East Conflict

The ongoing conflicts in the Middle East, including the involvement of the United States, Iran and other countries, as well as political and civil unrest related to the foregoing, could have severe adverse effects on regional and global economic markets. It is difficult to predict the conflicts’ impact on global and market conditions and, as a result, there is material uncertainty and risk with respect to us and our portfolio companies, and our ability and the ability of the portfolio companies to achieve their investment objectives.

We may be subject to risks related to investments in companies in the software industry.

The software industry can be significantly affected by intense competition, aggressive pricing, technological innovations, and product obsolescence. Companies in the software industry are subject to significant competitive pressures, such as aggressive pricing, new market entrants, competition for market share, short product cycles due to an accelerated rate of technological developments and the potential for limited earnings and/or falling profit margins. These companies also face the risks that new services, equipment or technologies will not be accepted by consumers and businesses or will become rapidly obsolete. These factors can affect the profitability of these companies and, as a result, the value of their securities. Also, patent protection is integral to the success of many companies in this industry, and profitability can be affected materially by, among other things, the cost of obtaining (or failing to obtain) patent approvals, the cost of litigating patent infringement and the loss of patent protection for products (which significantly increases pricing pressures and can materially reduce profitability with respect to such products) . In addition, many software companies have limited operating histories. Prices of these companies’ securities historically have been more volatile than other securities, especially over the short term.
